KSDA Web-Application

Jake Stephens & Rishi Ved

Background

- Kappa Sigma Fraternity brother website
  - Portal for us to organize and communicate
- Current version is outdated
  - Ruby on Rails
  - No access to source code
- Our goal: create new, improve web application

  - Anyone who takes 15-437 should be able to maintain

Background cont.

- Provide added functionality over existing web application
- Application should be in production by end of the semester
  - Fraternity will begin using it in F15

Core Functionalities

- Forum
- Document Repository
- Calendar
- Finances
- Waitsession/Worksession

Original Goals for Sprint #2

- Document Repository
  - Store files on s3
- Forum Page
  - Allows for threads, posts, and comments
- Finances Page
  - Integrate Venmo to allow for payment of fines
- Waitsession/Worksession assignment scripts
  - Requires custom Django commands

Post Sprint #2 Goals

- Testing
  - Utilize brothers and TAs as beta users
- Deployment to Heroku
  - Will not be in development mode, app will be live
